Consultant — Data Engineering • Building Pipelines

Profile

Data engineering consultant with 4 years of experience at Deloitte, progressing from data analyst to consultant. Specialised in cloud data integration across Informatica Intelligent Cloud Services (IICS), AWS, and GCP, building and supporting enterprise data pipelines for a leading consumer electronics and entertainment client.

Technical Skills

IICS / Informatica	Cloud Data Integration (CDI), Cloud Application Integration (CAI), mappings, taskflows, Mass Ingestion, Secure Agent, connectors, B2B Gateway / MFT
AWS	S3, Glue, EMR, Lambda, Redshift, EC2, IAM, CloudWatch, Athena, Step Functions
GCP	Cloud Storage (GCS), BigQuery, Dataproc, Dataflow, Cloud Functions, Cloud Composer, Pub/Sub, IAM
Languages	Python, PySpark, Rust, SQL, shell/CLI workflows
BI & Reporting	Power BI, advanced Excel (pivot tables, Power Query, lookups, dashboards), data visualization, stakeholder reporting
DevOps	Data pipelines, cloud development, data quality checks, Git/GitHub, Linux/CLI
Dev Tools	PyCharm, Jupyter Notebooks, SQL Workbench, Postman

Work Experience

Consultant — Data Engineering *Deloitte, Gurgaon*

Jun 2026 – Present

Consumer Electronics — Partner Data Integration

- Co-led and managed a team of 5 ETL developers, owning end-to-end delivery of data integration pipelines that move sales and inventory data from 30+ retail and distributor partners into internal systems.
- Designed, built, and maintained ETL pipelines in **Informatica IICS** (CDI/CAI), ingesting EDI X12 and IDoc partner feeds and processing over 2 million records daily for downstream reporting and operational systems.
- Optimised workflow performance by refactoring mappings and tuning load logic, reducing average pipeline runtime by ~35% (a 4-hour load cut to under 2.5 hours) and lowering the job failure rate from ~8% to under 2%.
- Configured and maintained secure **Managed File Transfer (MFT)** workflows for partner data exchange, setting up SFTP, AS2, SMTP, and SSH connections across 30+ partner integrations with 99.5% file-delivery success.
- Owned partner connectivity operations—managing 50+ certificate renewals, IP whitelisting, and credential updates—ensuring uninterrupted, secure file exchange with zero connectivity-related SLA breaches.
- Implemented data quality checks and reconciliation logic that reduced partner data discrepancies by ~40%, preventing downstream reporting errors prior to load.
- Monitored pipeline health and file transfers, troubleshooting failures and coordinating with partners and internal teams to maintain 99%+ SLA adherence and cut mean time to resolution by ~30%.

- Coordinated with business stakeholders to translate reporting needs into pipeline enhancements while mentoring and onboarding 4 new team members.

Data Analyst *Deloitte, Gurgaon*

Sep 2022 – May 2026

Technology — Generative AI Platform (RLHF)

- Contributed to the refinement of a no-code Generative AI platform for a large American MNC.
- Worked as a prompt annotator across multiple streams (SOF, CW Quality Study, Reward Modeling, LeetCode, Code Quality) on an RLHF-based project, reviewing and annotating 500+ prompts per week.
- Reviewed and refined carefully constructed prompts in a high-level language, incorporating multiple constraints, to support large language model (LLM) training while maintaining a 95%+ quality-acceptance rate.
- Acted as gatekeeper and final reviewer across two critical project phases, within a small team responsible for overall delivery quality.
- Reviewed peer work and onboarded 6 new team members, bringing them up to speed within their first two weeks.

Automotive — SQL Development & Data Migration

- Worked as an SQL developer for a UK-based car manufacturer, creating 50+ PostgreSQL tables from Excel data to form the database powering an online marketplace; indexed data using the ELK stack.
- Transformed large volumes of Excel files (100k+ rows) into database-ready formats using custom scripts, ensuring data accuracy and completeness throughout the migration.
- Analysed and refined slow-running queries, implementing indexing strategies and query optimisations that reduced average query response time by ~60% and supported higher transaction volumes.

Data Analyst Intern *Deloitte, Gurgaon*

Feb 2022 – Jul 2022

- Gained hands-on experience with **Microsoft Azure**, building an internal data pipeline on Azure Data Factory to ingest and consolidate operational data from 5+ source systems into Azure Blob Storage and Azure SQL Database.
- Performed data cleaning, transformation, and validation on the ingested datasets, modelling them for analysis and ensuring quality and consistency across the internal reporting layer.
- Developed dashboards and summary reports in Power BI on top of the Azure data layer, surfacing key operational metrics to stakeholders and reducing manual reporting effort by ~50% (several hours saved weekly).

Education

B.Tech Mechanical Engineering, Manipal University Jaipur, India

2022

Study phase: 4 (185 Academic Credits)

Languages

English (professional proficiency), Hindi (native), French (basic)
